

## REGISTERED HOLOGRAM VARNISH GENERIC GLOBE DESIGN

### Technical data & Specification

The R4213 ribbon allows the application of a registered hologram (an optical variable design) on card in a form of a transparent layer. Thanks to this ribbon, you add security to your cards. A hologram is not possible to duplicate and simplifies the examination process. The hologram applied is the following one (Generic Globe Design):

#### General Specification

- **Type:** Security ribbon
- **Description:** Registered Hologram Overlay – Generic Globe Design.
- **Features:** The R4213 is a continuous ribbon in PET with a release holographic overlay and a heat activated adhesive. The ribbons propose by Evolis are totally transparent ribbons comprising holographic an optical images. Its composition allows a good resistance, a protection from exposure to water, an enhanced chemical resistance and an excellent adhesion on card surface. This hologram is a generic one. Evolis gives you a turnkey solution to protect your cards and your information. The holographic artwork is already created, composed by security features, ready to be used.
- **Storage Information:** It is recommended that this product is used within one year. Avoid dust, direct sunlight, high humidity and high temperatures. Do not place near solvent or other chemicals.

#### Compatibility and printing capacity

- **P/N 4213:** Securion. Up to 400 prints per roll.

#### Advantages

Your cards are protected against forgeries and falsification. Tested and validated by Evolis R&D and Quality departments, these consumables bring you printing quality and reliability. Use Evolis High Trust® ribbons to keep off defects and to benefit from high-quality printouts and at an optimal cost-per-card.

Evolis card printers + Evolis High Trust® consumables = the winning combination!
