### Quick access

For users that frequently need to use their mobile devices, the REFUGE Holster allows an easy-in ; easy-out access to the device, with efficient protection.

### Optimal security

The closing flap strap prevents the device from falling down, providing at the same time easy access to the device.

- Holsters to carry any Hand Held Devices safely
- 4 sizes to fit all devices
- Delivered with a belt (max. length : 185cm)
- Front pocket
- Pen & stylus holder
- Front pocket
- High resistance Nylon 1680D
- Available options : Stylus, Shoulder Strap, Screen Protectors...

# SCREEN PROTECTOR

MOBILIS® 

## Anti-Shock IK06

The most impact-resistant Screen Protector

### Key Points

- **Strength** : **The best anti-shock protection in the market** available in several finishes. Clear, Matte, Blue Light Cut and Privacy.
- **User experience** : Free your mind, don't be afraid to break your screen anymore, and fully enjoy your device. Of course the functionality of your device remains **unchanged thanks to a high sensitivity to pressure**. This screen protector is **repositionable, pleasant to use and smooth to the touch**.
- **In front of any impact** : Currently, it's the most impact-resistant protection. These products are **unbreakable and don't crack**, which gives them an **exceptional lifetime**.

**More than 2 000 references available for smartphones, tablets, hybrids, notebooks...**

**4 finishes available :**

**Clear, Matte, Blue Light Cut and Privacy**

#### How to choose your finish ?

**You need optimal visibility** : Clear is a transparent finish without any filter between the screen and the eye.

**You use your device outdoors, or don't want to see fingerprints anymore** : The Matte finish removes bothersome light reflections. Its satin finish make fingerprints invisible and keeps your screen clean longer.

**You want to protect your eyes from blue light** : Artificial blue light emitted by screens tires the eyes, dries them out and is capable of causing long term damage. The Blue Light Cut filter blocks blue wavelengths and reduces eyestrain.

**You have confidential data ?** : Prying, or simply curious, gazes fall constantly on your screens. The privacy filter allows you to work on important files anywhere by turning the screen black for people who stand next to you, while leaving more than 80% visibility for the user. How to choose your finish.

#### IK06 norm protection

The IK standard determines the level of protection against mechanical impacts, according to the NF EN 62262 norm (NF C 20-015). A rating of IK-06 indicates a one-joule impact resistance.

#### 5H Hardness Anti-Scratch

Our shock-resistant screen protectors are rated 5H on the hardness scale between 0H and 10H (for diamonds), which determines resistance to touch, pressure, shearing, friction and shock.

#### Why a screen protector ?

**91% of users have already broken a screen !**

On average a screen costs :

- 500 € for a laptop
- 200 € for a tablet
- 100 € for a smartphone

Protecting the device 100% of the time increases its lifespan and thus improves the Total Cost of Ownership !

**For more information, visit our web site : [www.mobiliscase.com](http://www.mobiliscase.com)**

## Anti-Shock IK06 - Finishes

### Clear

- IK06 : anti-shock, anti-breakage
- 99% transparency
- 5H Hardness anti-scratch
- Quick and easy setup
- Electrostatic absorption
- Repositionable
- Thickness : 0.33mm

### Matte

- IK06 : anti-shock, anti-breakage
- Anti-fingerprints
- Anti-glare
- 5H Hardness anti-scratch
- Quick and easy setup
- Electrostatic absorption
- Repositionable
- Thickness : 0.33mm

### Blue Light Cut

- IK06 : anti-shock, anti-breakage
- protects your eyes against blue light, reduce eye strain and dry eyes
- 5H Hardness anti-scratch
- Quick and easy setup
- Electrostatic absorption
- Repositionable
- Thickness : 0.4mm

### Privacy

- IK06 : anti-shock, anti-breakage
- 180° Privacy filter
- 5H Hardness anti-scratch
- Quick and easy setup
- Electrostatic absorption
- Repositionable
- Anti-fingerprints
- Anti-glare
- Thickness : 0.4mm

## Installation instructions

## Packaging composition

### Cleaning Kit provided

- 1 anti-dust adhesive
- 1 microfiber fabric
- 1 cleaning pad
- 1 smoothing card

# SCREEN PROTECTOR

MOBILIS® 

## Tempered Glass 9H

The most scratch resistant Screen Protector

**3 finishes available :**  
**Clear, Matte and Privacy**

### Key Points

- **Strength** : Tempered Glass 9H hardness norm makes it **the most resistant screen protector in front of scratch**.
- **User experience** : it's the **best user experience**, with a glass touch which facilitate the use and allows you to **fully enjoy all functionalities** of your device.
- **In front of an impact** : real fuse against screen break. Its role is to break **absorbing the impact to protect you device screen**.

### How to choose your finish ?

**You need optimal visibility** : Clear is a transparent finish without any filter between the screen and the eye.

**You use your device outdoors, or don't want to see fingerprints anymore** : The Matte finish removes bothersome light reflections. Its satin finish make fingerprints invisible and keeps your screen clean longer.

**You have confidential data ?** : Prying, or simply curious, gazes fall constantly on your screens. The privacy filter allows you to work on important files anywhere by turning the screen black for people who stand next to you, while leaving more than 80% visibility for the user. How to choose your finish.

**More than 2 000 references available for smartphones, tablets, hybrids, notebooks...**

#### 9H Hardness Anti-Scratch

9H grade takes place on the top-level of a hardness scale just before diamond and determines resistance to touch, pressure, shearing, friction and shock.

#### IK03 norm protection

The IK standard determines the level of protection against mechanical impacts, according to the NF EN 62262 norm (NF C 20-015).

#### Why a screen protector ?

**91% of users have already broken a screen !**

On average a screen costs :

- 500 € for a laptop
- 200 € for a tablet
- 100 € for a smartphone

Protecting the device 100% of the time increases its lifespan and thus improves the Total Cost of Ownership !

# SCREEN PROTECTORS

## PROTECTION NORM

The IK standard defines the degree of protection against external mechanical shocks. It is standardized according to NF EN 62262 (NF C 20-015). The IK06 rating indicates resistance to a 1-joule impact (equivalent to the impact of a 250gr mass dropped from a height of 40cm).

## ANTI-SCRATCH HARDNESS

9H is the hardest grade (behind diamond, which is 10H) on a scale defining resistance to touch, pressure, shearing, chafing and shock. Therefore, 9H is the best degree of anti-scratch protection that exists for screens.

## ANTI-FINGERPRINT

Even with regular cleaning, fingerprints and smudges are always visible on your smartphones' and tablets' touchscreens. Thanks to its anti-fingerprint effect, a matte finish prevents this unpleasantness.

## BUBBLE FREE

These protections are really easy to set with their bubble free technology which avoids the unpleasant and difficult moment of applying the screen protector. If any small bubble appears during the set-up, it will automatically disappear within 24h.

## ANTI-GLARE

The anti-glare feature prevents the reflection of sun and lighting on screens, allowing users to check their devices in luminous places without being constrained by glare.

## OLEOPHOBIC

Don't be afraid of coffee drips, food spots or dust traces anymore. With their matte finish, anti-stain screen protectors prevent any mark from staining your screen.

## ELECTROSTATIC ABSORPTION

Static electricity causes dust and dirt to adhere to all kinds of screens. It interferes with your usage and reduces the lifetime of your devices. Electrostatic absorption technology eliminates static cling.

## PRIVACY FINISH

With its 60° angle of visibility, the privacy filter protects your data from curious or prying eyes.

# PRIVACY FILTERS

Laptop

LCD Screen

Hybrid PC

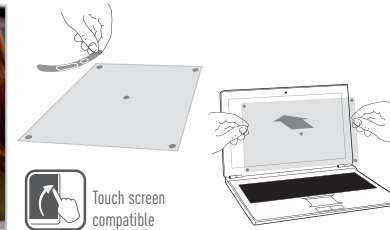

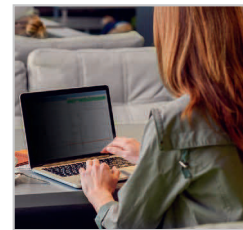

## With MOBILIS privacy filters, check your sensitive data wherever you want.

MOBILIS privacy filters use a microshutter technology which allows only the person in front of the screen to view the displayed data. People on either side only see black.

This essential protection allows you to work in total security whether in public spaces, trains, planes... or even at the office!

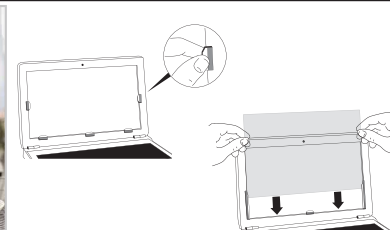

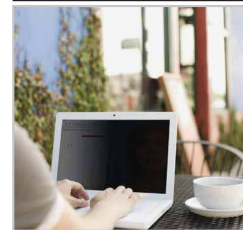

## Effectively protect your data from prying eyes.

### ADHESIVE PADS INSTALLATION

Touch screen compatible

### HANG TABS INSTALLATION

### Packaging composed of :

- Privacy filter, in transparent sleeve
- Instructions for use
- 1 anti-dust adhesive
- Adhesive pads
- 1 microfiber fabric
- Hang tabs
- Compatible with laptops, hybrid PC and LCD screens
- Compatible with the major part of touchscreens
- 2 mounting systems to adapt to your requirements
- Not permanent, easily removable for teamwork
- Available from 12,1" to 24"
