Change your POV on POS

The time is right.
Right for a change at the POS!

Show the best side of your POS with the innovative Colormetrics POS systems. Our POS systems are technically state-of-the-art and combine a unique design with excellent quality and well thought-out user-friendliness. Ensure for excitement at the POS for your staff and customers – with Colormetrics.

Many POS systems are simply — boring. Way too little thought was put into them. And the truth is, the impression that the POS gives is often the last one that the customer takes with him when he leaves the store. Sometimes it is even the first one when he comes in. We think that the POS should be classy — and that it should leave a positive impression on your customers.

Colormetrics – the POS
with that individual touch.

You have taste and a mind of your own – that's why you are currently holding our brochure in your hands.

Stay individual with your POS, too. We have a broad range of accessories for you, with which you adapt all Colormetrics products to your daily work routine. At a workplace tailored to you and your requirements, both you and your staff will work better – and be satisfied. Your customers will take notice!

Give your business a personal touch with Colormetrics. All of our POS systems are entirely customisable with your colours and logo. Your POS is ready for a change!

P5500

Change your POV on modularity

Hits the bull's eye when it comes to expectations

Thanks to its modern and fanless design in black/silver, the P5500 all-in-one POS system particularly impresses in working areas where a lot of importance is attached to a quiet atmosphere. The 15.6" full HD widescreen display with a brightness of 350 nits, up to 32 GB DDR4 RAM and a powerful 8th generation CPU combination – Intel Celeron 4305UE, Core i3-8145UE and Core i5-8265U of the Whiskey Lake platform – also ensure particularly high flexibility.

Two easily accessible M.2 SSD slots make the P5500 and its expansions very maintenance-friendly. A VESA mount (75 x 75 mm) makes it easy to attach the all-in-one POS system to the wall or a pole.

A look at the system:

Accessories:

C1000 mPOS

Change your POV on mobility

The POS is everywhere

With the innovative C1000 mPOS all-in-one POS system your POS becomes mobile. This saves your staff from doing things twice, and thus, a lot of time. The big benefit of the C1000 mPOS: it is a flexible and expandable tablet PC with a 10" IPS multi-touch display (1,280 × 800 pixels) and is ideally suited for taking orders in restaurants, as a sales assistant in retail and in inventory taking in the warehouse. You scan, document, cash in and manage documents independent of the location.

The expansion cover is impact-resistant from 1.2 m and is easy to clean. In combination with two optional modules (the expansion cover and the docking station), the tablet transforms into a fully-fledged robust POS.

One, two, three: C1000 mPOS makes you mobile!

Expansion cover with diverse accessories (scanner, back-up battery, magnetic stripe reader, NFC or 4G module, etc.)

Windows or Android tablet (optionally with a rear camera)

Docking station with many interfaces (USB & Powered USB, RS-232, etc.)

Expansion cover options:

1D/2D barcode scanner

NFC reader/writer or 4G module

Magnetic stripe reader

Smart card reader

Back-up battery

USB port

Docking station accessories:

Pole customer display (VFD 2× 20 or customer display 12", 13", 15")

5 different expansion cards with diverse interfaces (see data sheet)

EXCERPT FROM THE ACCESSORIES RANGE ON PAGE 27.

C1400

Change your POV on intensity

Fabulously well thought out POS system

The innovative C1400 all-in-one POS system with integrated 80 mm direct thermal receipt printer is characterised by its particularly chic design and enormous versatility. Thanks to the numerous individual customisation options, your employees' work is not only faster, but also easier. What's more, with its 14" widescreen PCAP display in a practical stand format, the POS system fits into almost any POS workstation – especially where excellent taste and style are important.

The inner values of the POS system are decisive for its good performance. A power-saving Intel ATOM X5-E8000 processor with 1.04 GHz, up to 8 GB RAM and an M.2 SSD, as well as a comprehensive multi-interface, speak for themselves.

A look at the system:

Accessories:

V1000 Series

Change your POV on variety

A real eye-catcher

With the vertically constructed all-in-one POS systems of the V-Series we present you with a POS with that something extra. It will leave a positive memory in your customers' minds plus will also excite you and your staff.

Very user-friendly

We attached the display of the V1000 Series all-in-one POS system directly to the stand. This not only looks very chic, it makes the higher mounted monitor very ergonomic to operate, too. The V1000 Series is available with a resistive or capacitive 12.1", 15" or 15.6" monitor and also really bright: the light intensity of the 12.1" display is 500 nits, for example. Thus, it is easily readable in sunlight and under electric lighting. This checkout system is equipped with 6 USB ports, two of which are placed on its side for quick access. Thanks to an integrated Intel HD graphics chip, you may also utilise demanding graphics programs at the POS.

A look at the system:

Accessories:

Customer display (VFD 2 × 20 or customer display 8", 9.7")

Magnetic stripe reader, RFID reader, iButton (also available as a combination)

P4000 Series

Change your POV on flexibility

Just as flexible as you are

Slimmer, lighter, faster, more elegant and a maximum of flexibility - that's the P4000 Series from Colormetrics. The P4000 Series all-in-one POS systems were designed in a 4:3 format for design lovers and will impress your staff and customers alike. The 15" front panel of the P4000 models is IP64-certified and thus protected against the ingress of dust and liquids. The touch screen is available as a resistive or capacitive variant. Three processors ensure for top performance: Celeron J1900, 3965U, Core i3 and Core i5.

This one? This one? Or this one?

Since no POS is like any other, we have equipped the P4000 Series with numerous connection options (24 V Powered USB, LPT, RS-232, etc.). We additionally offer you a broad portfolio of accessories. Plus, you may customise the all-in-one POS systems according to your wishes. For more flexibility. For more satisfaction at the POS.

A look at the system:

Accessories:

P3100

Change your POV on extensively

The big picture at the POS

Demonstrate true size at your POS - with the Colormetrics P3100. The large 17" display with a zero-bezel surface is a real eye-catcher and intuitively easy to use. It is available as a resistive or capacitive variant. Equipped with an IP64-protected front panel, the P3100 easily withstands everyday challenges, such as dust, liquids and dirt. A 24 V Powered USB port ensures for direct power supply to the peripherals.

The P3100 is ideally suited for usage in hospitality. Thanks to its VESA 100 bracket, it may be attached to any wall in an instant.

A look at the system:

Fanless

Accessories:

Customer display (VFD 2× 20)

Pole customer display (8", 9.7", 15")

Magnetic stripe or smart card reader, RFID reader, waiter's lock, fingerprint reader (also available as a combination)

1D/2D barcode scanner, waiter's lock, RFID reader (also available as a combination)

P2100

Change your POV on popularity

Reliability makes speed popular

The P2000 Series with its 15" touch display (choice of resistive or capacitive technology) is our pack animal – and has long since moved beyond its reputation as an insider tip! This robust and highly reliable all-in-one POS system is represented at checkouts worldwide since 2014. During this time it has particularly developed into everybody's favourite in hospitality, thanks to its reliability and robust construction. No wonder, since the P2000 Series has many good features: it features an elegant design with bezel-free screen and an robust aluminium housing. The P2100 is easy to use and is very quiet, since it operates without a fan. Plus, it is equipped with a powerful processor with up to 2.7 GHz and may be flexibly adapted to your individual needs at the POS.

A look at the system:

Accessories:

P1000

Change your POV on economically

For those who want more for less

The Colormetrics P1000 all-in-one touch POS system was developed for everyone in retail and hospitality who places great value on an elegant design and wants a whole lot of POS at a low cost – in short, for you!

Quite a lot of POS

The P1000 Series features a large 15" touch display (capacitive or resistive) with an outstanding resolution of 1,024 × 768 pixels and 300 nits of brightness. Its power supply is integrated in the stand. It is also very quiet, since it operates without mechanical ventilation and moving parts. Thanks to its VESA 100 bracket, the P1000 Series is the ideal POS system for the small POS – a whole lot of POS system in a compact footprint.

A look at the system:

Accessories:

P1300

Change your POV on versatility

Shines at the POS

The Colormetrics P1300 all-in-one POS system is designed for everyone in retail who is looking for a powerful, attractively priced POS system. Its compact design also allows it to be integrated into almost any POS area.

For all those who value power

The P1300 has a 15" panel display with resistive or capacitive touch technology and a powerful 7th generation Intel Core i3-7500U processor with up to 2.4 GHz and extremely low power consumption. The robust POS system operates silently, as it does not require mechanical ventilation or moving parts. Thanks to the particularly large number of connection options, the application possibilities of the P1300 are also noticeably expanded – and so are yours!

A look at the system:

Accessories:

PS1000

Change your POV on completely

Does the job of two, thanks to the integrated receipt printer

Allow us to introduce the PS1000, our first all-in-one-and-more POS system. It has the specifications of the P1000 (for example, a zero-bezel 15" display, whose touch panel is IP64-certified). The PS1000 is so efficient that it does the work of two. Psst, we'll let you in on the secret of its efficiency – we integrated a rapid direct thermal printer into its stand. It prints up to 260 mm/sec. That's practical, don't you think? And very efficient. You kill two birds with one stone with the PS1000 – plus have more space at the POS, since you no longer need an additional receipt printer.

Highly adaptable at the POS

The PS1000 is equipped with a powerful Intel processor with 2 GHz and may be adapted, as needed, with your choice of a comprehensive range of accessories.

A look at the system:

Accessories:

Accessories

Change your POV on adaptivity

Adaptivity is extremely important for the modern Point of Sale! After all, the requirements for a POS system are quite different in a restaurant than they are in a boutique – or in a grocery store, a kiosk or a jewelry shop.

The wishes that staff and customers have for a POS are just as varying as the POS itself. Thank goodness for the adaptable all-in-one POS systems from Colormetrics!

POS systems with a lot of finesse for effective work at the POS

Our POS systems may be individually adapted to your POS with a comprehensive range of accessories. Thus, you quickly turn a POS system into a fully equipped, highly functional POS which makes work for both you and your staff faster and more effective.

The accessories – speak for themselves

Start a dialogue with your customers now – with a VFD display or a second monitor. Inform them about special offers at the same time to generate additional sales.

Save space at the POS

And a whole lot of time. With barcode scanners, magnetic stripe and smart card readers attached directly to the monitor, plus a stand and waiter's lock, your staff works more effectively. And they won't get tangled up in annoying cables again, thanks to seamless accessory integration.

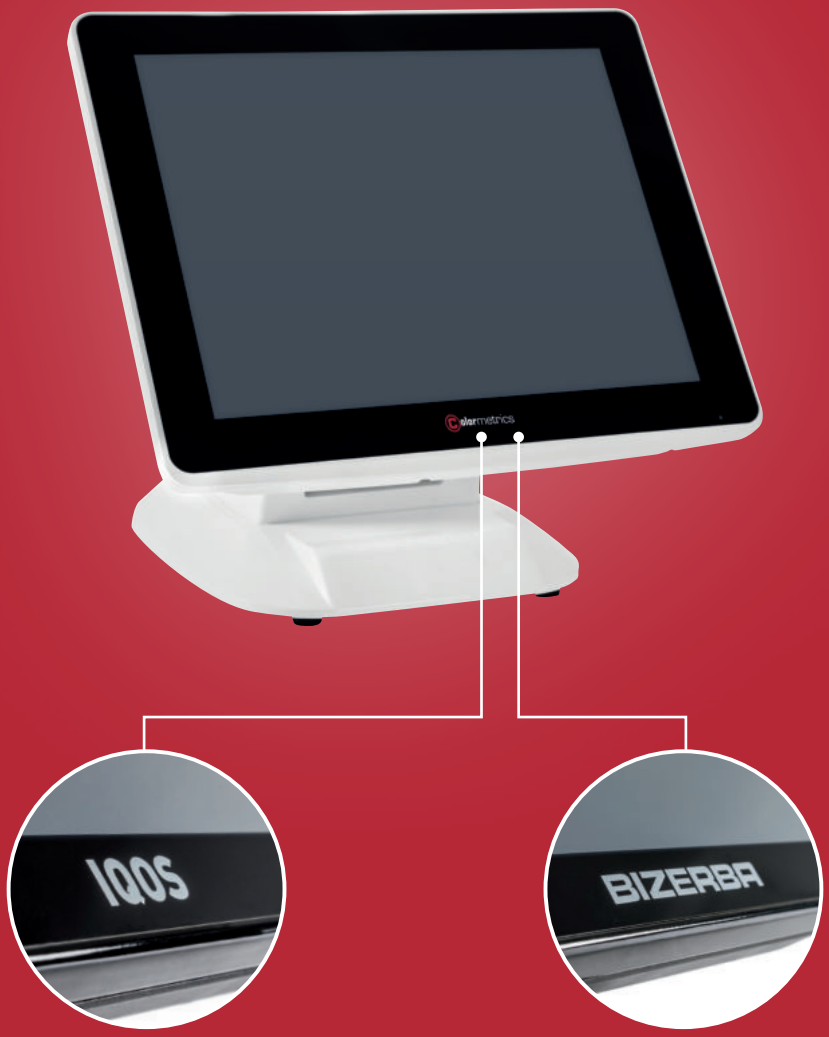
Your personal POS

Change your POV on individuality



You love individuality and you have taste – then you have the right mindset for Colormetrics!

In case you find »a standard, normal POS« way too boring or not functional enough, we also offer many possibilities for you to optically and functionally adapt your POS system to your specific POS needs.

We turn your POS into a corporate identity advocate

Starting with a small order amount we place your logo on the POS system and change (upon request) the housing colour or the start screen according to your individual concept. We will gladly help you with the creation of your customised images, even via remote access, and deploy them before delivery. The result: a POS which 100% matches your company and your staff.

So talk with your sales representative now about the individual possibilities!

Choose your housing colour

Colormetrics Advantage Program

Change your POV on benefits

Colormetrics – your innovative partner with the plus in benefits.
