BIXOLON maintains ongoing efforts to enhance and upgrade the functions and quality of all our products.

In the following, product specifications and/or user manual content may be changed without prior notice.

Caution

Electronics, such as printers, are prone to damage by static electricity. Therefore, to protect the printer from static electricity, be sure to turn off the printer before connecting or disconnecting the cable to the rear of the printer. If the printer is damaged by static electricity, contact your local dealer.

This equipment is not suitable for use in locations where children are likely to be present. When the printer is operating with the media cover open, do not wear anything that can touch the drive, such as clothing, necklaces, rings, watches, or employee certificates close to it. Also, keep yourself away from the printer as it is dangerous for some parts of the body to come into contact with it. If an object or part of your body touches the drive, immediately disconnect the power cord or turn off the power switch on the back of the product.

Warning

Hazardous moving parts
Keep fingers and other body parts away
Pull the print head lever can be stop all moving parts.

IEC 60417-6057 (2011-05) for other moving parts.

Mise en garde

Les appareils électroniques, tels que les imprimantes, risquent d'être endommagés par l'électricité statique. Par conséquent, pour protéger l'imprimante de l'électricité statique, veuillez à l'éteindre avant de connecter ou de déconnecter le câble situé à l'arrière de celle-ci. Si l'imprimante est endommagée par l'électricité statique, contactez votre revendeur local

Cet appareil n'est pas adapté d'utiliser dans des endroits où des enfants sont probablement d'être présents.

Lorsque l'imprimante fonctionne avec le capot ouvert, ne portez rien qui puisse entrer en contact avec le mécanisme, tel que des vêtements, des colliers, des bagues, des montres ou des certificats d'employé à proximité. Éloignez-vous également de l'imprimante car il est dangereux que certaines parties du corps entrent en contact avec celle-ci. Si un objet ou une partie de votre corps entre en contact avec le mécanisme, débranchez immédiatement le câble d'alimentation ou éteignez l'interrupteur situé à l'arrière du produit.

Attention

Pièces mobiles dangereuses
Veuillez à ce que vos doigts ou toute partie du corps n'entre(nt) pas en contact avec ces pièces. Tirez le levier de la tête d'impression pour arrêter toutes les pièces en mouvement.

IEC 60417-6057 (2011-05) pour les autres pièces mobiles.

Compliance information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Caution: Exposure to Radio Frequency Radiation.

To comply with FCC RF exposure compliance requirements, a separation distance of at least 20 cm must be maintained between the antenna of this device and all persons.

Caution: Any Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

Class A Digital Device: Wired Device

This Apparatus complies with class "A" limits for radio interference as specified in the Canadian department of communications radio interference regulations.

This Class A digital apparatus complies with Canadian ICES-003.

Appareil numérique de classe A: appareil filaire

Get appareil est conforme aux normes class "A" d'interference radio tel que specifier par ministre canadien des communications dans les reglements d'interference radio.

Cet appareil numérique de la classe A est conform à la norme NMB-003 du Canada.

Waste Electrical and Electric Equipment (WEEE)

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources. Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling. Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

WARNING & CAUTION

Is described as death, physical injuries, serious financial losses, and damage to data etc. that can be caused to the user.

Do not connect multiple products to a single or faulty power outlet. Use only grounded power outlets that meet the industry standard. **Noncompliance may cause electric shock or fire.**

Only use authentic products from BIXOLON. **The company will not provide post-sale support for damaged or other quality issues that any fake (or refurbished) products may incur.**

Do not excessively bend or strain the power cord. Securely push the power cord all the way into the power outlet lest it remain loose. Make sure to hold the cord tight when separating it from the power outlet. Do not remove the power cord while the product is in use. **Noncompliance may cause electric shock or fire.**

Keep small accessories or other packaging materials away from young children. Beware: choking hazard. **Mishandling the product may incur injuries which may require seeking urgent medical attention.**

Keep excessive liquids away from the power cord and outlet. If matter is smeared onto the power cords, wipe with a dry cloth. **Noncompliance may cause electric shock or fire.**

Do not allow the product to be damaged by heavy objects. **Noncompliance may cause electric shock or fire.**

If the product emits a strange sound, burning smell, or smoke, turn off the power immediately and unplug the power cord. If the product is dropped or its exterior is damaged, turn off the power immediately and unplug the power cord. Do not subject the product to shock. **It may start a fire. It may damage the product.**

Install the product in a well-ventilated area by keeping it a certain distance from the wall. The product installed in certain places such as where a lot of fine dust is generated, where the temperature is too high or too low, where there is a lot of moisture or water, and at airports or stations that are used continuously for a long time may suffer serious quality problems due to the influence of the surrounding environment. **An increase in internal temperature may start a fire. Be sure to contact the place of purchase before installing the product.**

Install the product in a fixed place preventing it from tipping over. When moving the product, turn off the power and disconnect all connected cables, including the power cord. **It may damage the product.**

Never independently disassemble, repair, or modify the product as the warranty will become invalid. **When repair is necessary, contact the original place of purchase.**

Do not let any foreign substances enter the product. Do not place heavy objects, liquids, or metals on the product. **This could cause damage to the product or a fire.**

If there is a problem with the product, please contact the original place of purchase or through BIXOLON website's product repair page (www.bixolon.com).

Manual Introduction

This manual provides basic information on printers and provides ways to install, use, and check them. In order to protect the safety of users and prevent property damage, be fully familiar with this manual before using the product. Please use it.

Manual Symbol Introduction

	Precaution & Warning	It describes death, physical injuries, serious financial losses, and damage to data etc. that can be caused to the user.
	Note	It provides additional information on the function and performance of the product.

Product Symbol Introduction

	Error, Warning
	Paper Feeding
	Stand-By
	USB
	Ethernet

Printer Introduction

The SRP-S3000 is a premium 3-inch(80 mm) Linerless Printer built with LinerlessPro™ technology. Supporting multiple programming languages including BXL / POS, SLCS™, BPL-Z™ and BPL-C™. The SRP-S3000 provides stable printing for Linerless Extreme, Restick and Liner Label (Gap, Black Mark, Notch, Continuous) media. The standard colour LCD helps users to change the printer setting alongside count pending orders so they can optimise processing operations proactively.

The main features of the printer are as follows

1. LINERLESS PRINTER
2. Low-noise thermal transfer method printing
3. Maximum 200mm/s printing speed
4. 142 x 210 x 157 (W X D X H)
5. Interface: Serial, USB, Ethernet, WLAN(2.4GHz/5GHz), Bluetooth 5.2
6. Equipped with data buffer (receives print data even while printing)
7. Can print a range of barcodes
8. Range of printing density selectable
(Controlled with virtual memory switch management)

Option Components

Serial Cable (9pin - 9pin)

2. Product Part Names

2-1 Printer Part Names

2-2 Interface Part Names

- Connect the printer to the host computer using the right interface cable that complies with the specifications of the interface.

2-2-1 USB Interface (Device Function, USB B Type Connector)

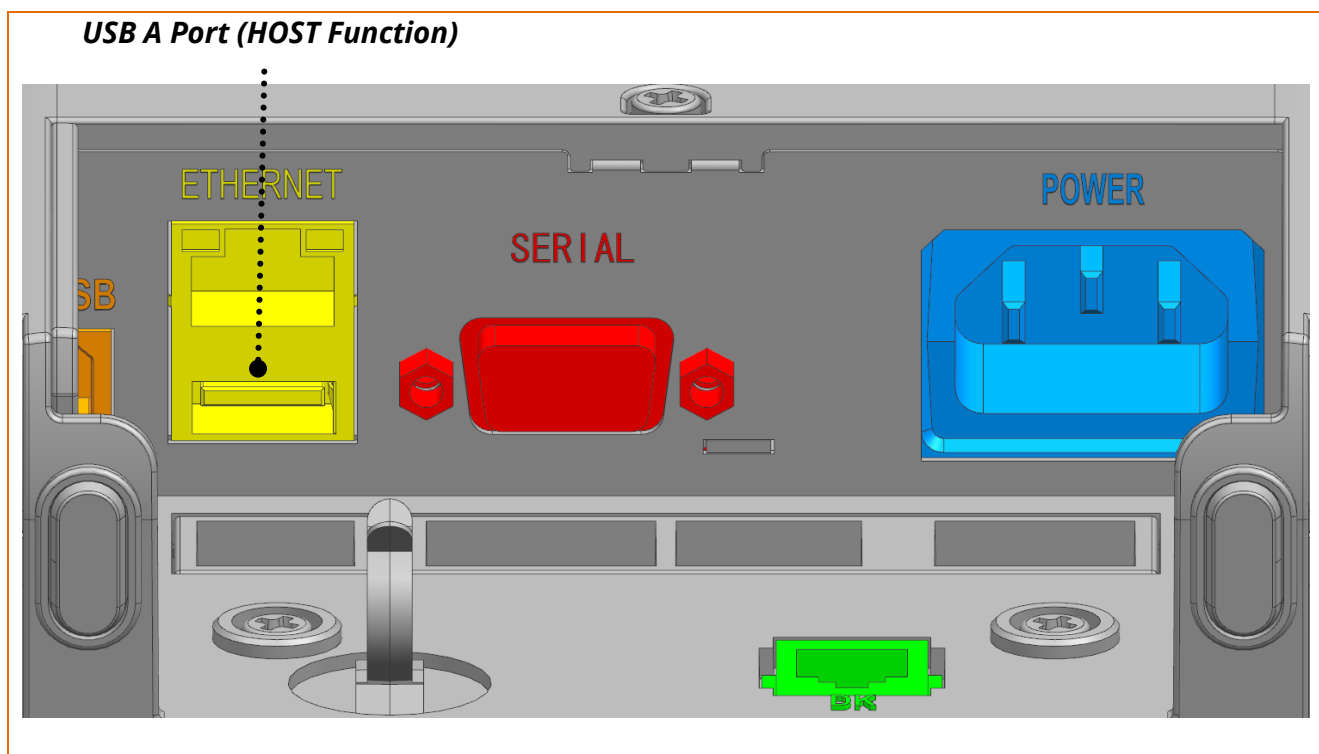

Pin No.	Signal Name	Designation (Color)	Function
Shell	Shield	Drain Cable	Frame Ground
1	VBUS	RED	Host Power
2	D-	WHITE	Data Line (D-)
3	D+	GREEN	Data Line (D+)
4	GND	BLACK	Signal Ground

Connect or disconnect the communication cable while the printer power is off. If power is on, your data may be lost.

2-2-2 USB Interface (HOST Function, USB A Type Connector)

Pin No.	Signal Name	Designation (Color)	Function
Shell	Shield	Drain Cable	Frame Ground
1	VBUS	RED	Host Power
2	D-	WHITE	Data Line (D-)
3	D+	GREEN	Data Line (D+)
4	GND	BLACK	Signal Ground

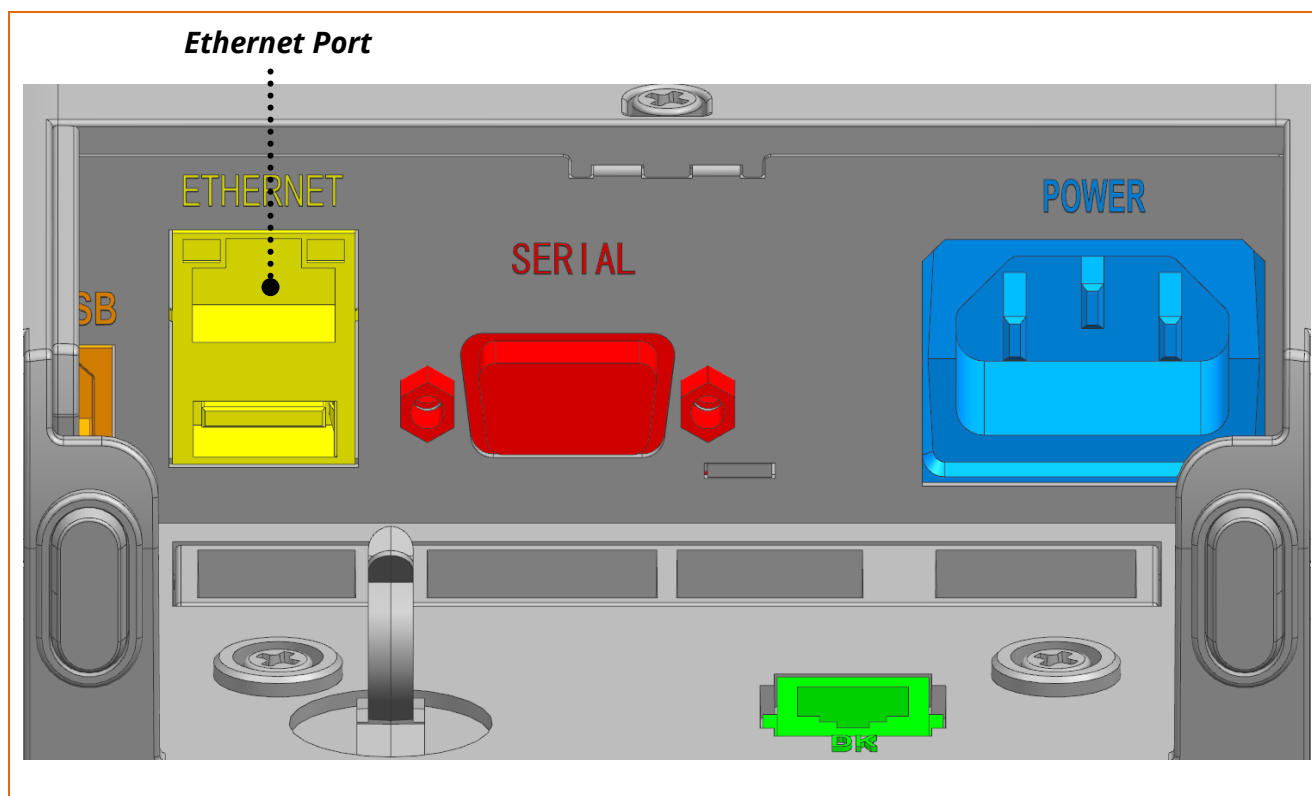

Connect or disconnect the communication cable while the printer power is off. If power is on, your data may be lost.

- USB Interface can connect to the peripheral devices. (ie. the barcode reader, customer display and WLAN Dongle that is supported by the printer.)
- Do not connect the USB A-A type cable with the Printer and HOST (ex. PC).

2-2-3 Ethernet Interface

Pin No.	Signal Name	Designation (Color)	Function
1	TD+	WHITE ORANGE	Transmit +
2	TD-	ORANGE	Transmit -
3	CT	WHITE GREEN	Center tap
4	NC	BLUE	-
5	NC	WHITE BLUE	-
6	NC	GREEN	-
7	RD+	WHITE BROWN	Receive +
8	RD-	BROWN	Receive -

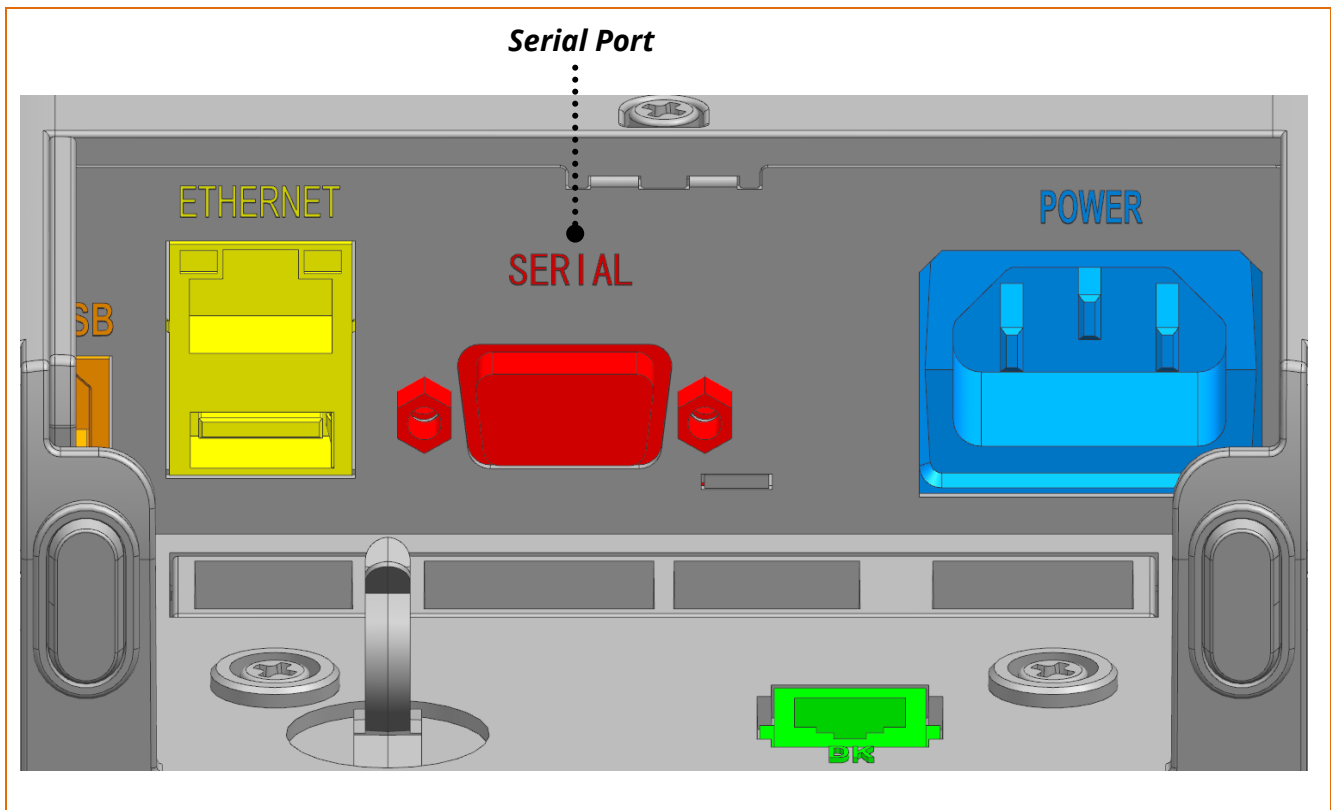

Connect or disconnect the communication cable while the printer power is off. If power is on, your data may be lost.

Refer to the Network Connection Manual for more detailed instructions about how to establish the connection. The Network connection manual is on the BIXOLON website (www.bixolon.com) We're offering it.

2-2-4 Serial Interface (RS-232C)

Pin No.	Signal Name	Direction	Function
1	NC	-	-
2	TxD	Output	Transmit Data
3	RxD	Input	Receive Data
6,8	RTS	Output	Ready To Send
4,7	CTS	Input	Clear To Send
5	SG	-	Signal Ground
9	NC	-	-

Connect or disconnect the communication cable while the printer power is off. If power is on, your data may be lost.

2-2-5 Wireless LAN Interface (Option)

1) Wireless LAN Communication Specifications

Item	Specifications
Frequency	2.4GHz / 5GHz
Protocol	802.11 a/b/g/n

2) Connecting Wireless LAN

Printer can be connected to terminal devices with Bluetooth communication Capability. (PDA, PC, smartphone, tablet PC, etc.)

Refer to the Network Connection Manual for more detailed instructions about how to establish the connection. The Network connection manual is on the BIXOLON website (www.bixolon.com) We're offering it.

2-2-6 Bluetooth Interface (Option)

1) Bluetooth Communication Specifications

Item	Specifications
Frequency	2.402~2.480 GHz
Version	5.2

2) Bluetooth Connection

Printer can be connected to terminal devices with Bluetooth communication Capability. (PDA, PC, smartphone, tablet PC, etc.)

Refer to the Bluetooth Connection Manual for more detailed instructions about how to establish the connection. The Bluetooth Connection manual is on the BIXOLON website (www.bixolon.com) We're offering it.

2-2-7 Drawer Kick-out Port

Connect the Drawer Kick-out cable to the drawer kick-out port on the rear side of the printer.

Pin No.	Signal Name	Direction
1	Frame Ground	-
2	Drawer Kick-out Drive Signal 1	Output
3	Drawer Open/Close Signal	Input
4	+24V	-
5	Drawer Kick-out Drive Signal 2	Output
6	Signal Ground	-

- Use a cash drawer that meets the printer specifications. Using a cash drawer that is inappropriate to the specs or Using it as a power supply for a separate device may result in damage to the product
- Do not connect a telephone line to the drawer kick-out port. Otherwise, the telephone line and the computer may be damaged.
- Do not allow a foreign object such as a conductor to touch the drawer kick-out port. This may result in damage to the product.
- Make sure to use a cash drawer with an internal coil resistance of 24 Ω or higher. (The maximum current is 1A.)
- The open signal time for the cash drawer should not exceed 0.8 seconds. After opening the cash drawer, make sure to idle for at least 3.2 seconds (at least 4 times that of the open signal time) before operating it.

3. Installation & Usage

3-1 Printer Installation Placings

- Allow sufficient space around the printer for proper ventilation.
- Do not place objects close to the back or bottom of the printer, which may hinder the air circulation.
- Install the printer on a flat and level surface.
- Avoid humid environment.
- Install in a place that does not exceed the protocol standard of the wireless communication or the specified maximum distance.
- For stable wireless communication, install in a place where there is no physical obstacle (wall, object, etc.).

3-2 Power on

1) After turning the printer off, connect the Power cord jack to the printer's power port.

2) When connecting the power cord jack, ensure that it is inserted in the correct direction.

3) Plug it into the power outlet on the wall.

4) Press the "ON" switch to turn on the printer.

- Check the power supply's label to check its electronic specs.
- Only use a power supply provided by BIXOLON. BIXOLON shall bear no responsibility for damage caused by using a third-party power supply.
- Pay attention to the direction in which you insert the power jack.
- When removing the power supply, make sure you have a firm grasp of the plug terminal of the power jack and the printer and pull horizontally.
- When connecting or disconnecting power, make sure to remove the power supply from the power outlet before removing.
- Do not connect a voltage out of the specifications of the power supply. It can cause damage to the product or a fire.

3-3 Inserting and changing the paper roll

Use paper roll that complies with the specifications

If you use a paper roll including paper core attached to paper, the paper may not be properly recognized as paper Empty due to not proper releasing of paper.

- **When opening or closing the cover, be careful not to pinch your fingers.**

- **Do not open the print head levers while the printer is printing. The printer may be damaged.**

- **Change the paper when the printer is not receiving data, or data may be lost.**

- **While the printer is operating, the printer head gets very hot, so turn off the power and let it cool down completely.**

The hot printer head can cause serious burns.

1) Open the paper roll cover by Pulling the Cover-Open Lever.

When you change the paper, remove the used paper roll.

2) Replace with a new one as shown in the image.

3) Check the orientation of the roll paper when inserting it into the printer.

4) Pull out a small amount of paper as shown in the picture, and close the Printer Cover.

When closing the Printer Cover, hold down the center of printer cover firmly so that paper roll is loaded correctly.

3-4 Using Controller

Explanation		
	Menu Navigation	Navigate the LCD menu - Press the button to navigate from the top-left to the bottom-right corner.
	Menu Select	Select an item in the LCD menu - Press the button to select an LCD menu item or save the settings to the printer.
	Home & Unlock	Return to the LCD main menu/activate a function - While navigating the LCD menu, press this button to return to the main menu or activate a selected item. - Hold the button to unlock the system. (2 seconds)
	Feed	Feed media or return to the previous menu - Hold this button while the printer boots up to print a self-test page. - Once booted up, press this button to feed media. - In the LCD menu, press this button to return to the previous menu.

Use LCD function or virtual memory switch utility to change and check printer settings. For more information, refer to the "6.LCD Menu" and Utility Manual in the User Manual.

3-5 Mounting Partition

- The Partition shape is the same and is used separately for each paper size (40,58mm). The position to secure the partition varies depending on the type of paper.

1. 58mm (2-inch) roll paper: mount 1 partition at Position #1.
2. 40mm roll paper: mount 2 partitions at Positions #1 and #2.

After using narrower papers (e.g. 40, 58 width) than the maximum paper width of 80mm, please do not use any wider ones as it might affect printing quality due to uneven platen roller abrasion.

The shape of the partition is the same for each type of roll paper.

4. Printer Setting Change

Use the Unified Utility or LCD to change the virtual memory switch settings.

- Turn the product power ON/OFF by using the virtual memory switch utility.
- For more details, please refer to Utility and [6. LCD Menu].

5. Self-Test

The self-test checks whether the printer has any problems.

If the self-diagnostics reveal no error in the printer, please see other device or software.

If the printer does not run normally, please contact the place of purchase.

- Do not open the top cover while the printer is running.

It may damage the printer.

- If the printer does not run normally, please contact Customer Center.

How to self-test

- 1) Turn on the printer. Go to Tool > Print Printer Settings on the LCD screen.
- 2) Press the Home button (Print) to start self-testing.
- 3) The printer settings will be printed on the first page followed by interface information.
- 4) The self-test process ends automatically after printing wireless interface information.

• Self-test print page sample

7. Maintenance

7-1 Paper Jam

• If paper is stuck, turn the printer ON/OFF and open the Printer Cover to remove the crumpled paper inside the printer. If the cover will not open, please follow the following instructions.

- 1) Turn the printer OFF.
- 2) Pull out the Cutter Cover to separate from the printer.
- 3) Turn the knob and insert the blade that sticks out using a cross-head screwdriver as shown below.
- 4) Push the Cover Open Button and remove the jammed paper.
- 5) Put the Cutter Cover back in place.
- 6) Turn the Printer Cover ON and use it.

If the cover does not open, do not forcibly open it. It may result in poor paper cutting or printer damage.

- Placing your hand above the printer outlet may cause a paper jam.
- In case of a minor jam, it may be possible that the operating blade returns to the original position by turning the printer OFF and then back ON.

7-2 Cleaning Printer

- The presence of dust, foreign matter, adhesive matter, or other pollutants inside the printer's head and internal capacity may undermine printing quality. Periodic cleaning (every 3 months at minimum) is recommended to maintain print quality. It is recommended to clean after every 30 rolls when using Sticky, Re-stick, Linerless Extreme paper.

- 1) Open the printer cover and remove the paper currently in use.
- 2) Residue or contamination of printer head should be wiped out by alcohol for medical.
- 3) Clean the paper sensor and paper roller with a cotton swab or a dry cloth.
- 4) Clean the cutter blade with a cloth wet with medical alcohol.
- 5) Insert a paper roll and close the printer cover.

- Be sure to clean after turning the printer off.
- Be careful not to leave scratches in the print head
The printer may be damaged.
- Print head is very hot while the printer is printing, so clean the printer after cooling it sufficiently with power off.
- Do not touch heated area of print-head when cleaning.
Personal injury may result from static electricity, etc.
